

Mexican Homestead

Observing exotic fabrics is like traveling to the place where they were made. The techniques used draw the viewer into the design and inspire creativity. The Japanese Floral (B5009) inspires through the use of positive/ negative space in cut outs. The Striped Floral with Embroidery from India inspires through the layered elements. The techniques used in these fabrics represent the countries they came from. I incorporated these ideas into my Mexican inspired collection by using a fringe technique from that country.
